

Topic: Pharmacy Management SystemABSTRACT:

One of the most important responsibilities of pharmacy management is to supervise and manage the pharmacy employees in order to ensure healthy working relationships and outcomes. Each of these functions is critical to the pharmacy's operation and should be explained by the management. However, most pharmacies faced problems such as insufficient service promotions, lack of coherence of pharmacy services in hospitals, poor drug information systems and the inconsistencies of the pharmacy information management due to its manual processes. Now these are the problems that must be solved with this Pharmacy management software system. This system will improve the efficiency of the company and enable for the storing of digital records.

Software Requirements:-

- SQL (Oracle) - For creating Database
- Creately - For System design
